Nieuw Nabuurschap Stichting

- STANDS FOR INCLUSION
- SUSTAINABLE: UTILIZING HUMAN CAPITAL
- FOR A LIVABLE SOCIETY FOR EVERYONE

The Foundation Nieuw Nabuurschap was established over 10 years ago as a result of a parent initiative.

Our mission is to promote the social participation of people at risk to developing psychosis.

We do this through a formula that is unique and innovative in the Netherlands!

HOW WE 'DO' IT

HOW DO WE ACHIEVE THAT!

The foundation is financed by donors and health care funds from the government!
The mission is shaped by a range of meaningful work activities in a professionally furnished office in the center of Groningen.

The stakes are twofold.

KLIK

On the one hand, we offer meaningful, work-related activities for our often highly educated people with a psychic vulnerability, they are our employees.!

KLIK

On the other hand, with the commitment of our employees, we provide services in the field of tax matters, allowances, administration and income management for similar and other vulnerable people!

KLIK

We work according to the principle "for and by"

With the help of professional staff and many expert and committed volunteers, we work hard to ensure that the work processes run smoothly. About 20 volunteers play an important role in this, they have a lot of affinity with the employees and are indispensable in the work processes. The volunteers support the employees in the performance of their tasks in the workplace. In addition to an affinity for the employees, they also have a lot of expertise in the field of financial administration, income management and tax matters.

For example, tax specialists, lawyers, bookkeepers and accountants are involved. They also have a different role in our set-up, they also bring the "normal" society into the workplace. In addition, our volunteers and the professional staff take final responsibility, so that the employees do not have to worry about this or experience pressure. Also annual training is offered on the various diseases and how to cope with them.

KLIK

Just an impression of the office and the workplace!

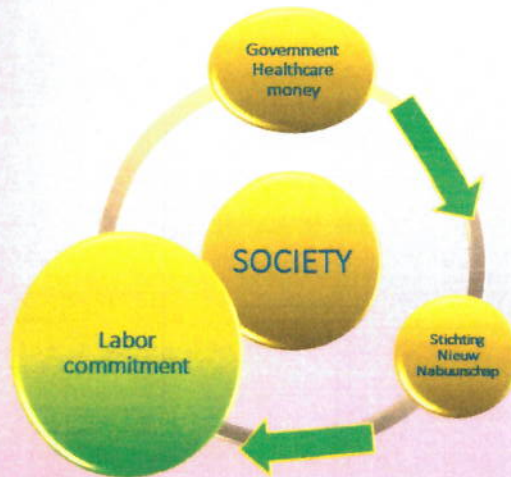

The employees work on the basis of equality in a representative office with an adjusted and structured work environment. The employees are part of the complete implementation process and contribute to what is feasible and possible, which can one day be more than the next. Social contacts can be promoted in this way. They work and have lunch together and spontaneous ideas arise about joint activities even outside the work situation.

LABOR COMMITMENT

ADDED VALUE:

- prevent isolation
- collaborate
- structure
- taken serious
- be welcome
- working on talent
- collegiality
- social contacts
- regularity
- matter
- Socially concerned
- meaningful
- Safety
- Intellectually challenged
- self confidence
- valuation
- fulfilment
- personal growth
- role model
- perspective
- less worry
- add something
- professional
- work at level
- independent
- meaning for others
- more energy
- Powered up

The emphasis is on the individual possibilities of the employee. The focus is on the healthy part.

Through the range of activities we see what happens to people. People are more empowered. Within the work situation and the emphasis is not on career but more on giving meaning and using the available human capital.

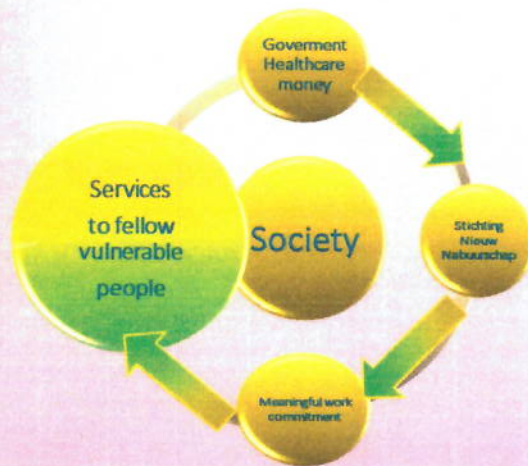

CLICK

It is more about recognition and appreciation, social contact, creating something, contributing according to one's ability, safety and security, self-realization and social embedding. In addition, getting satisfaction from participating, making a difference, being able to mean something to others, being challenged on intelligence, being expected somewhere, being part of something, being welcome.

See also the other terms that apply.

SERVICES

added value:

- o Worry less
- o Less stress about post from authorities
- o More time, energy and attention for other areas of life such as family, relationships, social network, work, etc.
- o Finance and administration optimally in order
- o Tax matters arranged (surcharges, etc.)
- o Jobs done that have been so dreaded
- o Put people more in their "mental" strength

"Slept well for weeks"

"Out of my system"

The services we offer to other vulnerable people have been kept low-threshold. There are no costs involved. The service provision is mainly related to unburdening vulnerable persons, so that there is less stress about the administrative burden and finances. As result there is more time, energy and attention for other areas of life such as relationships, living, working, family. After all, finances and administrations are in order and things that were so dreaded have been done.

CLICK

It is important to mention here that the services of the foundation are offered in accordance with national quality requirements and standards. The Foundation is a formal tax consultant and also designated as an information support center for Tax Allowances. The services of the New Neighborhood Foundation are HKZ certified for healthcare and the foundation is a member of the professional sector organization for Income Management: HORUS. Recently, the Foundation nieuw Nabuurschap has also been officially recognized by the court as a (specialist) Administrator. There are annual audits for healthcare and income management. This is not only important for the people who purchase the services, but especially for the people who contribute to the work process. This means that what we do is not just something, but it certainly matters and contributes. We work according to national standards and quality requirements!

With our services we also make an important contribution to poverty reduction and debt prevention!

CLICK

SOCIETY

ADDED VALUE:

- Less reliance on medical care
- Fewer people in isolation
- Less healthcare costs
- Limitation of involvement of the police and the judiciary
- People become visible again
- Less vulnerable people in debt and expensive administration
- Integration of people with psychic vulnerability
- Deployment of manpower according to ability and capacity

The formula of the Foundation Nieuw Nabuurschap also has its effects on our society. By deploying people in this way, the appeal to medical care is more limited because people feel better about themselves and there are fewer worries and stress factors. This can reduce healthcare costs. In addition, people become more visible and thus isolation is prevented and participation is promoted. Problems are identified earlier. This also reduces the involvement of the police and the judiciary. Integration is promoted and the available capacity is used through commitment to the capacity and capacity of the employees.

CLICK

The arrows indicate the flow of money. First it costs the government money to activate highly educated people with a psychological vulnerability within our Foundation. The foundation invests in good infrastructure and working conditions; this allows us to offer low-threshold services to vulnerable people and to unburden their fellow sufferers! Ultimately, this saves the government in turn because there are fewer costs.

RECOVERY

WORKING ON RECOVERY:

Functional recovery

Social recovery

Personal recovery

“Working on quality of life”

By deploying vulnerable persons in services for fellow vulnerable persons, this has an effect on functional recovery, social recovery and personal recovery. Recovery presupposes a return to the situation before the illness, which is certainly not always feasible, which is why we prefer to speak of working towards a better quality of life

After the clinical recovery, or parallel to it, the efforts of the New Neighborhood Foundation can make a positive contribution to the other recovery areas.

Functional recovery: includes the executive body functions on which people direct themselves, concentration arc, energy level, ability to break through patterns, et cetera....

Social recovery: more focused on work, social activities, the network, colleagues, education and social contacts

Personal recovery: is more about finding meaning and meaning, gaining self-confidence, experiencing appreciation, making a difference, seeing perspective, setting goals

Note: “Working on quality of life”

Summarizing:

"working on quality of life"

SUMMARIZING:

By offering work-related commitment, people are empowered and employees are empowered, so that they are able to shape the services for fellow sufferers. The available human capital is used, it gives respect, talent and quality mature, there is appreciation and there is meaning. The customer on whom the service is focused is relieved of worries, which promotes self-reliance, there is more attention and space for other areas of life, it offers peace of mind, attention is paid to combating poverty and debt prevention, gives hope again, accessible because the services are provided by fellow vulnerable persons, free or low cost.

Also read the captions on the different levels

See the dark green plus arrows

All these activities and developments contribute to a more inclusive society!!

SOME SIGHS:

"I SLEPT WELL FOR THE FIRST TIME IN WEEKS"

"THAT WAS ANOTHER NICE TAX REFUND"

"GRADUALLY I REGAIN OVERVIEW AND SPACE IN MY HEAD"

"HERE I MATTER AND CAN DO SOMETHING USEFUL AT MY LEVEL"

"PFFFF.... ADMINISTRATION IS IN ORDER WITH AND FINANCES"

"I WILL JOIN AGAIN....."

Just a few statements from our employees and customers. The formula has proven itself and is also scalable to other regions. Support centers have now been set up in Assen and Leeuwarden.

We show that people with a psychic vulnerability can indeed make a meaningful contribution in this society!

The Foundation Nieuw Nabuurschap is a sustainable and socially committed enterprise that aims to become a fully-fledged social enterprise in the long term.

SOCIAL RETURN

Horus.

Stichting
FTI

The way in which the Foundation Nieuw Nabuurschap contributes. The government invests money and ultimately gets a lot in return, which in turn saves money.
